January 1690.

Month Days.

Dark and melle densed clouds, till 4. the stars
We group'd in darkness, no man knew the way;
Heavens lights inform'd by Romes Scurry
Unto our drooping Spirits, and one ray
Of warming comfort yields, and we gave o'er
To hope Heaven would resolve as heretofore.

To take of Law, as private Law might,
 Affur'd works were of Disloyalty;
 The Law suspended by the Monarchs might,
 As filth befurring the Regalia;
 Cesar or Nothing I wold on all they do,
 For Monarchs know no medium betwixt these two

Month Days.

All Rules of Right and Lines of Reason tried,
I thus will, thus commend for the room,
The Limits of Marston & ends of Dun-laid waste,
Force upon force, shall thus all our down,
We tread this Wilderness full many a year,
Despairing from this thrall etern be clear.

*Mens pent up all long for their Phylloxera did flow,
How much they did desire the Marchall's sword,
Their courage in offensive did grow,
And whisper'd thus, not daring to be heard;
We'll fairly fall, and free men to our Graves
We'll chuse a grave rather than to be slaves.*

To stop this growth, let us intent a Plot
 Quoth the sly Priest, we'll put them in a rage,
 And when ensnar'd, we'll bring them to the bar,
 And then as Rebels bring them on the stage:
 One Judges make, Another Juries find,
 Witnesles too, according to our mind.

From those that cruelly did us oppress:
Inspir'd a Prince, and rais'd his mind so high,
Above what mortal contemplations try.

So much accounted of, so much in danger;
Not worth regarding now; what-cursed Fate
Attends poor England? Each seeing stranger
Amazed is to see such Factions grow,
From little things the whole to overthrow.

Will wonder at your readiness to Bow
Unto that Baal, which you could ne'er obey:
If French Dragooning you so much desire,
Plunge you your selves, not us into that Fire.*

Month Days.

For England's King and Queen lit us all pray,
That God their Scepter guide in Righteousness;
Let's, like good Subjects, chearfully obey,
With heavenly, Earthly Goods be will us bless.
Nor Pope, nor Turk shall ever England move,
When King's joynd to the People and the Law.

By the help of this Table, and the Ψ 's Southing, you may find the time of High-water in any of the Ports specified in this Table, by adding the hours and minutes against the Port, to the hours and minutes of the Ψ 's Southing; the aggregate or sum is the hour and minute of the time of High-water at that Port, subtracting 12 if your number exceeds it. Having so often explained the use of this Table, I hope it needs no further Explanation.

When the Ψ shines so bright, as to cast a shadow on the Sundial; see where the shadow falls, count how many hours and minutes it wants of 12, and subtract that from the time of her Southing that Night, and the remainder is the hour of the Night; If the shadow be upon any of the hours past, add it to the time of the Ψ 's Southing, and that is the hour of the Night, subtracting 12. If the number exceed it. If the shadow be on 12. the hour and minutes of the Southing is the time of the Night. I have so often explained each Page and Columne of the Almanack, that I need not do it here again.

Whilst

Astrological Observations for the Year 1690.

Whilst the Superiors angry Brows were bent,
And streams of pois'nous Influences sent,
Whilst shaveling Monks cry'd up the Good Old Cause,
And Wolves in Lambskins murdered the Laws
By a dispensing Power: Whilst Knaves and Fools
Were woven into Lynsly-woolly Tools,
To gull us of our Liberties and Laws,
And naked throw us into the greedy Paws
Of Villanous Monsters void of Humanity,
Try'd Rogues, and skill'd in all Barbarity;
Damn'd Teagues and Tories too, that would not start,
To tear from Mother's womb, the Infants heart, &c.
Whilst we those Dangers view'd, and trembling stood,
Ready to launch into a Sea of Blood,
Heaven heard our Cries; and pitied our Fears:
Puk'd the high Babel 'bout the Builders ears.
A Joshua sent, these Giants to withstand,
And lead us safely into the Promis'd Land,
Who shed no blood, nor sought he to destroy
His very Foes; he melted all with joy.
Without a blow the sturdiest bands he broke,
Who his Commands obey'd before he spoke.
Let's Incense burn to Heaven, than pay our Vows,
And with blest Laurel deck his Conquering brows.

Of the Winter Quarter.

THis Quarter begins with the ☉'s entrance into the Tropick of VS, which happens this year on *Tuesday* the 10th day of *December*, at 13 h. and 45 minut. past Noon; or according to more Vulgar Computation, on the 11th day, at 45 minutes past 1 in the Morning. At which time 18 deg. and 28 minut. of ♊, or the Balance, Ascends the Horizon, and 24 deg. and 20 minut. of ♋, is upon the Midheaven. ♊ is Rampant in the descending part of Heaven, well Aspected by the ☉, who is also cherished by the benevolent Rays of ♋, which gives us great hopes of the
Auspicious

Auspicious Conduct of Affairs in *England*, after our long disturbed and distracted Turmoils, and Tergiversations. We have of late been under the *Quartile* Influences of the two Superiors in *Cardinal Signs*, that hath spent its malevolent upon many Parts of the World in Disturbances, strange and unheard-of Revolutions in Empires, Kingdoms, and States. Not to mention any thing more of the unparalleled Revolutions in the *Ottoman Empire*, which I hinted in my last, and at that time durst mention nothing nearer home. At which time the Laws of *England*, so dearly purchased by our Prudent Ancestors, and the Protestant Religion sprung up out of the Ashes and Blood of our Pious and Martyr'd Forefathers, lay trampled upon under the feet of Jesuits, and their wicked Mercenary Accomplices; Till Heaven (in Mercy) heard the cries of the Oppressed, and for his Names sake, and never failing Compassions to his poor distressed Church and People, Inspired the Virtuous and Magnanimous Prince of *Orange*, and his Princess, now our most gracious King and Queen, to adventure their Royal Persons and Interest, to Rescue us, and our Laws, and Religion, from that force it lay under, whose Valour and Integrity, God in his Providence rewarded with answerable Success, and Crown'd their Endeavours with a miraculous *Catastrophe*, and overturning this poor Nations Enemies. For which, let us render thanks to our God, study how to walk answerable to so great a Deliverance, and let us beware of murmuring against God's hand, and his glorious Instruments. Let us labour to outdo each other in Allegiance, Duty and Affection to Their Majesties, and in mutual Love and Charity to one another. As the Season of the Year is unfit for Action, so the Heavens seem to incline Mens minds to Treaties, Embassies, Messages, and Consultations of high Concerns. But towards the latter end of *January*, the two Infortunes oppose each other, and the ☉ and ♀ in *Quartile Aspect* unto them both; so that af-

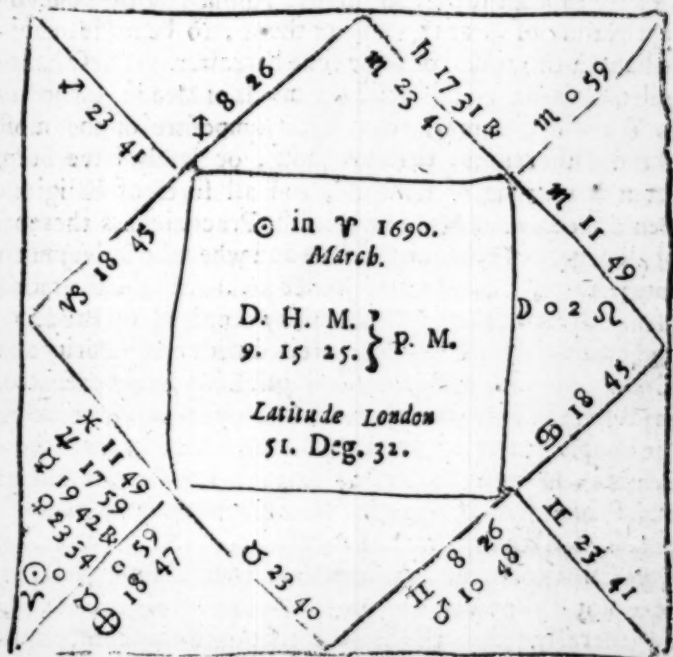

ter a long Silence and Secret Consultations. no wonder if we hear the noise of Wars and Slaughters: No wonder, if the World be acquainted with the effects of Civil Discords, of Mutual Hatred and Malice. The Ottoman Empire will yet be sensible of these Disorders; and it were well if Europe were, or might be free. These malevolents are in ☐ Aspect to the Triple ☿ of 1682. and 1683. No wonder then, if the ☿ of the Malevolents shall be attended with such eminent Effects ☿ transites the Celestial Sign ☿, which according to the Opinion of Astrologers, is the Horoscope of Ireland, which Kingdom is likely to suffer yet more, according to the heavenly Influences, and so much the more, if it be not by this time Reduced to the Obedience of England. It being at the writing hereof, in a sad and deplorable Condition, lying under the Ravage and Spoil of the Barbarous Irish, and Savage French, against both which God is pouring out his Vials of Wrath, and avenging the Innocent Blood that hath been shed by them; and the cruel and barbarous Usage that his poor Saints and Servants have suffered, for keeping Faith and a good Conscience towards God. The Places more immediately concerned in these evil Influences, are the Places under III and ☿, some of which I shall mention Under ☿, are Russia, Polonia major, Moravia, Campania, Hungary, Switzerland, Persia, Cyprus, Parthia, Ireland. Cities, Parma, Nants, Bononia, Sena, Mantua, Sicily, Figur, Tarentum, Lucern, Lipsick; Under III, are Norway the higher, Bavaria, Cappadogia, Idumea, Catalonia, Barbary, Eez, Cities, Gaunt, Messina in Italy, Frankford upon Oder, Valencia, &c. The Countrys and Cities under ☿, are not like to go Scotfree, viz. Italy, Sicily, Bohemia, Alps, Gallia, Togata, Phania, Apuleina, part of Turkey, Samaria, Tartaria, Muscovia, Westphalia, Mosel, Ethiopia, Media, Arabia. Cities, Damasus, Siracuse, Rome, Ravenna, Cremona, Vims, Prague, Lints, Bristol and Hamborough, Breme, Monserat, Pisarum, Ingolstadt and Trent, &c. many Places

more might be named, nor is it to be supposed, that all the Places that are named, shall be subjected to all the evil Influences signified, or all be Sufferers at one time, or in one and the same manner, *Deus Astra regit*, and he disposeth their Influences as he pleaseth.

Of the Spring-Quarter.

THIS Quarter commenceth this year by the *Caroline Tables*, on *Sunday* the 9th of *March*, at 15 h. and 25 m. Afternoon, which is on *Monday* the 10th, 25 min. past 3 in the Morning, at which time the *Sun* toucheth the first scruple of the Equinoctial Sign *Aries*. The Position of Heaven, is as followeth.

There is so great a difference in Astronomical Tables, in computing the time of the Vernal Equinox, that it is not

safe to give Judgment on the Figure of the Heavens, but rather consider the Radiations of the Erraticks among each other, as they are mutually Aspected, and draw a Judgment therefrom.

The first thing that offers it self to view, is the Δ Aspect of the two Superiors, whose welcome Influences will not be ungrateful to the oppressed and distressed part of *Christendom*, who have long lain under the Miseries of War, Firings, Desolations, Rapines and Bloodshed. \mathcal{U} is strong, and essentially dignified in the places where he is; h out of essential Dignities, and Retrograde: \mathcal{U} is swift in motion, h is slow. From whence (according to natural Causes) we may expect those good things, signified by the benevolent Nature of \mathcal{U} at the time of the \odot , to be made manifest about this time, or some time hereafter. These benevolent Aspects would excite the minds of Men in Authority to Peace and Amity, to a full Composure of the most grand Differences, that are now, or lately have been. From \mathcal{U} we judg of Religion, and all sorts of Religious Men; the Laws of Nations, and the Practitioners thereof, of all degrees. He signifieth (when and where he Rules) much Integrity and Uprightness, Justice and Faithfulness among Men. Great Peace and Tranquility obtained by Prudence and Moderation; Religion exercised with much Purity and Sincerity of Life and Doctrine; just Laws freely executed, the Rulers and Magistrates much honoured and revered; the People receiving great Justice and Benefits from their Princes; Honours conferr'd on many, new Laws, Customs and Priviledges bestowed. He signifieth Plenty and Increase of all things for the benefit of Man, Health of Body, Tranquility of Mind, wholesome and seasonable Air, fortunate Voyages by Sea, and prosperous Endeavours by Land; he generally remits all the Evils that h would inflict upon a People or Nation.

Yet will *Saturn*, or rather men signified by him, operate closely, subtilly, and with a seeming kind of Moderation, in their Counsels and Projects, but with a malevolent kind of Spirit, in matters Politick, and Ecclesiastick, cunningly, and for self-ends, endeavour to subvert and suppress those more sober and honest Intents, endeavoured for the Peace and Tranquility of Kingdoms, Nations, and People. Let Princes beware of these deceitful, sordid, and pernicious kind of Jesuitical Vipers, who will inhabit the Courts of Princes, and endeavour to undermine, deceive, and subvert the most wholesom Purposes, to promote their own Interest and Profit, and advance their Hypocrisy, Idolatry and Superstition. It is to be noted, that at this auspicious Trine, the Planet ♀, who is exalted in the Sign of ♋, is in ☾ with ♃, and so is ♄ and the ♀ in ♋, in her own House, applying to them all, by a trine Aspect; which signifieth, a ready concurrence between King and People, to settle a general Peace, righteous Government, such Laws and Customs that may appear to be most just and profitable to the People. That Christian Religion shall be more zealously, and purely Professed, and an increase of the Knowledge thereof; and an abolishing of unnecessary and superstitious Ceremonies.

It is true, we have ♂ in ♐, applying to a ☐ to ♃, and the other Planets with him; It signifieth Rebellions, Slaughters or Murders, Mischiefs and Robberies, and many Evils committed under the Cloak of Religion. If he shall be in ♐, he signifieth Wars and Contentions, and Robberies in the *Northern* Parts; that the King in that Revolution shall have Victory over his Enemies: If he hath North Latitude, it signifieth much Rain. I wish that the Evils signified by ♂ in ♐, may give no more affliction to the City of *London*, than the usual and common Calamity of Robbing, Thieving, Clipping and Coyning of false Money; such a sort of People will be very active about this time; of which, the
careful

careful Magistrates will be watchful; and I doubt not of their Care and Diligence in suppressing Seditious Persons, and all things that tend to Sedition; and let not her Inhabitants be deluded by the Insinuations and tracherous Designs of the Crafty and Pernicious Jesuits, to fly from their own Mercies, and be perverted from their Obedience and Allegiance to the best of Princes this Nation ever knew; and the best Government (when once settled) that any Kingdom, Nation, or People have been sensible of, since the ungrateful *Jews* rejected God and his Judges. Under *Gemini*, are *Sardinia*, part of *Lumbardy*, part of *England*, *Flanders*, *Brabant*, the Dukedom of *Wirtemberg*, *Hircania*, *Armenia*, *Cyrenia*, *Martiana*, *Egypt* the Lower. Of Cities, *London*, *Corduba*, *Turin*, *Paris*, *Louvain*, *Brabant*, *Bruges* in *Flanders*, *Mentz*, *Moguntia*, *Künzing*, *Hasford*, *Bamberg*, *Norimberg*, &c. Happy are we, if we make use of those Mercies God hath freely bestowed upon us in this Kingdom, whilst we may take up a woful Complaint, and a sad Lamentation for many of our Neighbour Nations, in the words of the Learned *Spinna*, 'Oh! how many Changes of Kingdoms? Oh! what sorts and differences of Dangers and Troubles, are to be feared? What unspeakable, great and grievous Villanies? Oh! what turbulent and damnable Seditions? Oh! what unlooked and unhop'd for kind of Death? Oh! what exalting of wicked and reprobate Men, the troubled Stars of Heaven do in abundance belch out? What wretched and indigent Persons are every where extolled, and the rich Impoverished and Oppressed? How many Subjects and Servants shall Rule, while Princes and Masters obey, &c. Thus *Spinna* as Translated by *Elias Ashmole* Esq.; I fear this is the fate of too many Kingdoms, whilst we have reason to hope for a growing Prosperity to the Kingdom of *England*, and her Allies. Poor *Ireland* hath been in a suffering Condition these two years last past, and I fear they are not yet settled,

nor will they be these several years repaired. *France* begins to decline; the Glory of that Monarch is shaken by Invasions and intestine Divisions.

Of the Summer Quarter.

THis Quarter Astronomers always account to begin, when the *Sun* enters the first Scruple of the Tropical Sign ♊ , and makes our longest day; and it happens this year on *Wednesday* the 11th of *June*, at 42 minutes past 4 in the Morning. At which time 8 degrees, and 53 minutes of *Pisces* Culminates upon the Midheaven; and 11 degrees, and 45 minutes of *Cancer*, ascends the Eastern Horizon, which seems to be beautified with the presence of the glorious Planet *Venus*, with *Mercury* accompanying her. We have *Aries* the Ascendant of *England*, occupied by the benevolent Planet *Jupiter*; and the Planet *Mars* in the *Regal Lion* in Trine to him, which hath a very good Signification to *England* in general: great Glory, Honour and Prosperity to His Majesty, and the Government; with Peace and Tranquility to the People in general. Several Learned and Eminent Men of the Long Robe honoured and advanced; and many Clergy-men for their Piety and Learning, rewarded and exalted. And we have sufficient Ground to predict, at least to hope for good Success, of his *Britanick Majesty's* Arms, wherever employed, and the like to his *Allies*, which God in his Mercy grant.

We have *Mars* in a Quartile Aspect to *Saturn*. Significat quod erunt multa furta, latrones, & prædones multi & manifesti; & accident populo, anxietates & mala ex parte regum, & ipsi non erunt eis Obedientes. It signifieth many Robberies, eminent Robbers and Plunderers, publick and audacious; that there shall happen many Oppressions and Evils to the People from their King; and that they shall be Disobedient, and Rebel against him. This *Apborism* will probably be verified upon the *French King*. *Saturn* is in *Scorpio*, and *Mars* in *Leo*, in Quartile to him, which

which afflicts him both in his Person and Honour; for the Heavens threaten him, and Providence seems to Retaliate and Reward him for the Evils and Mischiefs with which he hath afflicted all *Europe*; more of this before I conclude. He is threatned with ill Success, and much loss in his Maritime Affairs; that he shall be very unfortunate in his Counsels; that the Jesuits and Priests shall give him such pernicious Counsel, that shall prove much to his Loss and Damage. Poor *Ireland* seems to labour under a heavy weight of Affliction, or at best, hath not recovered her Strength, but groans under the Losses and Ruins she hath sustained by War, Spoils and Rapines; *meliora sperata*. *Italy* not in a prosperous Condition, nor is St. Peter's Seat an easy Throne. Indeed all the Princes and States of *Europe* are uneasy, all busy and engaged in warlike Enterprizes; the *Scorpions* poison hath inflamed the Blood of the whole Universe; and he that first led the Dance, may in all probability pay the Piper, &c.

Of the Autumnal-Quarter.

Autumnal or Harvest Quarter, commenceth this year on Friday the 12th of September, at 14 min. past 6 at Night; at which time the sun toucheth the first Scruple of the Equinoctial Sign *Libra*, making the Days and Nights of equal Length. At the Ingress 3 deg. and 12 min. of *VS*, is upon the Midheaven; and 8 deg. 27 minut. of *Aries* or the *Ram*, ascends our East Horizon. On which is the Planet Υ , opposed by the Planet \odot , and the \circ , which probably may occasion great heat in the Air, engendering Thunder, Lightning, and Storms: Fears and Jealousies among Men, Whispering against, and Calumniating their Superiors, for which some are likely to Suffer. Some Eminent Man of the Long-Robe, or one in great Authority questioned or disgraced. Nor will this Quarter pass without some Slaughter or Rencounter; where Armies are near, or Towns besieged, we may expect to hear of more than ordinary

ordinary Actions; probably those places under ♈, are most likely to suffer. I shall not insert the places under ♋ and ♌, for fear I shall prove too Voluminous for my Scantling of paper allowed me.

In *November*, the two Malevolent Planets are in ♄ in 23 deg. of ♈. It presageth great Evils and Disturbances to *Europe*. The Earth and Seas are disquieted with the Alarms of War; many Murthers and Seditions; with all manner of wretched Miseries attending. Mankind generally oppressed with abundance of obnoxious Diseases. The Effects will principally appear the year succeeding, therefore I shall make no further mention of them now. A Great Man in *Europe* is likely to feel the smart of their Malignity, both as to the Health of his Body, and Retrogradation of his Affairs. And because I have so often hinted at him, lest any *Artists* should think that I do it without Ground, let them consider what follows.

This year the Ascendant comes to the ☐ of ♀, who is Lord of the 8th and 10th Houses, which imports Danger to his Life and Honour.

	D. M.
Oblique Ascension of the ☐ of ♀	293 21
Oblique Ascension of the Ascendant	241 55
Arch of Direction is	51 26

Which by *Nairob's* Measure of Times, gives 52 years. and a little more than two Months, which nearly meets this Conjunction of *Saturn* and *Mars*. And it is much to be doubted whether the *Sun* to the Body of *Jupiter*, which happeneth almost a year before, will stand off, or alleviate the Effects of this. But this we must leave to the dispose of the Almighty, in whose hands are the Lives and Fortunes of all Princes and Peasants.

Astrological Observations, 1690.

Of the Eclipses, both Solar and Lunar, which happen
this Year 1690

There will be two of the ☉, and as many of the ☾: The first will be of the ☉, On February the 28th, to us not Visible; The second of the ☾, on the 14th of March Visible, the Calculation followeth. The third of the ☉, will be on the 24th of August not seen. The fourth will be an Invisible Eclipse of the ☾, on September the 8th day.

Astrological Observations

At the time of the middle of the Eclipse, 2 degrees and 43 Minutes of *Virgo* is upon the Midhaven; and 15 degrees and 19 minutes of *Scorpio* upon the Ascendant. *Saturn* in the Ascendant, and *Mars* Lord thereof in *Gemini* in the eighth House in Quartile to *Jupiter* and *Mercury*. *Proclus* saith, That the Moon Eclipsed, *In decem libra primis gradibus, grandines, & fidas alias tempestates provocat.* In the first 10 degrees of *Libra*, it signifieth Hail, Storms, foul Weather, turbulent Winds, violent and harmful Tempests. The Eclipse happening in an Equinoctial Sign, hath relation to the change of Air; and signifieth Prejudice to the Budding, Sprouting, or Blowing of Trees; and to Herbs springing out of the Ground at that time. It signifieth Controversies in Religion, and some Change and Alteration therein. *Saturn*, as Ruler of the Eclipse signifieth, Diseases of long continuance, by reason of Cold and Deflux of Rhume, as Consumptions and Quartane Agues: Banishments, Poverty, Misery, Death of old Men. Death and Diseases to great Cattel, such as are serviceable to Man. Tempests at Sea, and great Disorders, &c. *Mars* causeth Corruption by too much Dryness; he stirs up Seditions, Tumults, Intestine Risings, Imprisonments, Banishments; the Frowns of Princes towards their rebellious Subjects; some arraigned and suffer Condign Punishment. Tertian Fevers, and acute Diseases, by reason of Corruption of Blood; sudden Deaths to some. Stirs up the Soldiers to Violence, Rapines, Bloodshed, &c. I shall say no more of this Eclipse. The Heavens seem to have a favourable Aspect upon the Kingdom of England, and the Government thereof.

And let us pray, That God may bless Their Majesties, our gracious King WILLIAM and Queen MARY, with Health, long Life, and a prosperous Reign. Amen.

Sic in se sua per Vestigia voluitur Annus.

*Thus doth the winding of the circling year,
Trace its own footsteps, and the same appear.
The heavenly Train by a standing Law do move,
Whilst all Sublunaries unconstant prove.
Our fretting Age receives, and stealing glides,
And the swift Year on loose-rein'd Horses rides.
All things pass on: Those Creatures which are made
Fail, and by Time's assidue Motion fade.
Much like the running Stream; which cannot stay;
No more can our light hours that pass away.
But as one billow hastening to the shore,
Impels another, and still that before
Is by the following driven; so we conclude
Of Time, it so flies, and is so pursu'd.
The hours are always new; and what hath been,
Is never more to be perceiv'd or seen:
That daily grows, which had before no ground;
And Minutes past once, never more are found.
Thus Men on Time's swift wing, unwarily
Pass on, and sink into Eternity.
Let Times swift foot move us to contemplate;
And to take care of our Eternal State.
The better we our fleeting Time do spend,
The fitter we to make a pious End.*
